## Special Issue

## Developing Novel Therapies to Prevent Atherosclerosis

### Message from the Guest Editor

Despite the vast amount of clinical and pre-clinical research that has been invested in the prevention of atherosclerosis, it continues to affect more than 30% of Western populations. The identification of new targets that regulate atherosclerosis, and the development of more plague modifying therapies, are therefore required. The mechanisms that underlie atherosclerosis are still not fully understood, in particular, how these mechanisms may change with the stage of atherosclerosis is under appreciated. This Special Issue seeks original research manuscripts and reviews that address a range of topics that are related to the use of current therapies, their failures and/or successes, and new up and-and coming therapies. The identification of new regulators of atherosclerosis based on preclinical findings is also welcomed.

### **About the Journal**

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### **Editors-in-Chief**

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

### **Author Benefits**

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
