Polycystic Ovary Syndrome: Clinical Diagnosis and Management

Message from the Guest Editors

Polycystic ovary syndrome (PCOS) is one of the most common endocrine diseases in women of reproductive age. We have to care for affected women using a holistic approach. Moreover, concerning hyperandrogenism itself, PCOS patients often complain that there are insufficient treatment options available. Very often, combined oral contraception and metformin are associated with either side effects or insufficient treatment success. Hence, new treatment modalities are needed. Additionally, uncovering the consequences of PCOS on pregnancy is also a point of clinical relevance and interest. Accordingly, the scope of this Special Issue, “Polycystic Ovary Syndrome: Clinical Diagnosis and Management”, is to provide an overview of recent advances in the field of PCOS. We would like to encourage all researchers in the field to submit an original article or review to this Special Issue (case reports and short reviews are not accepted). We are looking forward to your submissions and thank you for your support of the Journal of Clinical Medicine! Keywords: polycystic ovary syndrome; overweight; insulin resistance; management; pregnancy; genetics; treatment; therapy

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief
