

## Special Issue

# Cardiomyopathy: Clinical Diagnosis and Treatment

### Message from the Guest Editor

Takotsubo syndrome, proposed in 1990, is a myocardial disorder characterized by asystole of the apex of the heart that develops in response to severe physical or mental stress. As the concept of the disease has been widely recognized around the world and many research results have been reported, it has become clear that it presents with various cardiac complications. In recent years, it has also become clear that the prognosis is not always favorable. Thus, since the concept of Takotsubo syndrome was first introduced, a great deal of knowledge has been accumulated, and its clinical landscape is gradually becoming clearer, but the pathogenesis remains unclear. Moreover, the pathogenesis of the disease remains unclear, and its elucidation is awaited in order to establish treatment guidelines for this disease. In this Special Issue, we would like to present the latest findings on Takotsubo cardiomyopathy from various viewpoints and share this information with readers.

## About the Journal

### Message from the Editorial Board

*Journal of Clinical Medicine* (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
