## Special Issue

# Clinical Trends in Regenerative Medicine

## Message from the Guest Editor

What was once considered impossible in medicine is finally becoming possible—tissue regeneration in the treatment of many diseases and conditions. The goal of regenerative medicine is to untangle the language of cells and to develop new treatments to be able to restore or establish normal function by replacing. engineering, or regenerating human cells, tissues, or organs that have been lost or injured due to age, disease, or congenital defects. Regenerative medicine propagates gentle and minimally invasive interventions that are used in both acute injuries and chronic inflammatory conditions. It involves research in multiple areas, each of which is complex, but together, they stand as a powerful combination of technologies, such as stem cells, gene editing, nuclear transfer, proteomics, pharmacology, nanotechnology, tissue engineering, three-dimensional printing, and biomanufacturing. The research in all these fields and disciplines advances rapidly. With this special issue, we hope to encourage submissions that discuss the current state-of-art, address the developing approaches and focus on the current strategies to pursue the objectives of regenerative medicine.

## **Guest Editor**

Dr. Dominik Duscher

Department of Plastic, Reconstructive, Hand and Burn Surgery, BG-Trauma Center, Eberhard Karls University Tuebingen, Schnarrenbergstrasse 95, 72076 Tübingen, Germany

## **About the Journal**

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## **Editors-in-Chief**

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

## **Author Benefits**

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

## **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
