Urinary Tract Infection: Prevention, Diagnosis, and Treatment

Message from the Guest Editor

Urinary tract infections (UTIs) are a common disease. The incidence of UTIs is rising globally due to a selection of multiresistant bacteria not responding to common antibiotics. The effect of UTIs on comorbid or vulnerable adults and children is a known risk factor for urosepsis, which in turn can lead to systemic complications. The aetiology of UTIs is mainly related to habits and environmental factors; however, baseline pathology such as immunosuppression or diabetes mellitus can play a role. Kidney stones disease (KSD) and bladder outflow obstruction are often associated with UTIs, and more research is needed to investigate the role of UTIs in recurrent kidney stones formation. The prevention and treatment of UTIs is of paramount importance to prevent serious and life-threatening complications. The aim of this Special Issue is to provide an overview on recent strategies for the prevention, diagnosis, and treatment of recurrent UTIs and related complications. We invite researchers in the field of UTIs to submit an original article or review to this Special Issue (Please note that case reports and short reviews will not be accepted).

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
