

Special Issue

Comorbidities and Complications of Cerebral Palsy

Message from the Guest Editors

Cerebral palsy is the most common cause of physical disability in childhood that, despite evidence of falling prevalence in some Western countries, remains a global concern. The aim of this Special Issue is to provide an overview of recent advances in the treatment of the associated comorbidities and complications of cerebral palsy. Increased prescription of technology means that we are treating some comorbidities of cerebral palsy earlier or even pre-emptively. As we prepare children with cerebral palsy for adulthood, there is more thought and discussion around issues such as pain, mental health, quality of life and independence. Researchers in the field of cerebral palsy are encouraged to submit original articles or reviews to this Special Issue (case reports and short reviews are not accepted), so that we can build our evidence base to guide decision making. Keywords: cerebral palsy; family factors; physical health; mental health; prevention (primary and secondary); interventions; management; quality of life

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
