

Special Issue

Comorbidities and Complications of Cerebral Palsy

Message from the Guest Editors

Cerebral palsy is the most common cause of physical disability in childhood that, despite evidence of falling prevalence in some Western countries, remains a global concern. The aim of this Special Issue is to provide an overview of recent advances in the treatment of the associated comorbidities and complications of cerebral palsy. Increased prescription of technology means that we are treating some comorbidities of cerebral palsy earlier or even pre-emptively. As we prepare children with cerebral palsy for adulthood, there is more thought and discussion around issues such as pain, mental health, quality of life and independence. Researchers in the field of cerebral palsy are encouraged to submit original articles or reviews to this Special Issue (case reports and short reviews are not accepted), so that we can build our evidence base to guide decision making. Keywords: cerebral palsy; family factors; physical health; mental health; prevention (primary and secondary); interventions; management; quality of life

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France
