Classification, Diagnosis and Treatment of Coronary Microvascular Dysfunction

Message from the Guest Editor

Coronary microvascular dysfunction (CMVD) is an underdiagnosed condition defined by impaired structure and function of microvascular coronary vessels (MCV). CMVD is characterized by capillary rarefaction, inward remodeling of arterioles, impaired vasodilation, and paradoxical vasoconstriction of MCV. Cardiovascular risk factors, cardiomyopathies, inflammation, platelet activation, and autonomic dysfunction may act in coordination to determine CMVD, but not all of them need to be present. Diagnosis of CMVD could be done via both non-invasive and invasive evaluation of coronary flow reserve (CFR) and through invasive provocative tests for the diagnosis of microvascular vasospasm. CMVD is associated with an increased risk of major adverse cardiac events. Lifestyle changes, risk factor management, anti-ischemic drugs, and aggressive therapy with statins and ace inhibitors are the cornerstone of therapy for CMVD.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
