

Special Issue

The Treatment of Coronary Artery Disease and the Impact of This on All Cardiomyopathies

Message from the Guest Editor

In this Special Issue, we will present the clinical characteristics of bystander CAD in all forms of cardiomyopathy. We will expose the strengths and weaknesses of non-invasive and invasive imaging techniques as well as describe the use of cross-modality and multi-modality imaging in this setting. Finally, we will propose randomized clinical trials designed to evaluate treatment strategies.

I am sure that this Special Issue will allow readers to have a more precise knowledge regarding cardiomyopathy and bystander CAD, which will improve the management of their patients.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France
