

Special Issue

Assessment and Treatment of Coronary Artery Disease: Current Status, Challenges and Future Directions

Message from the Guest Editor

We are currently working on a Special Issue of the Journal of Clinical Medicine focusing on the treatment of coronary artery disease.

In particular, this Special Issue will focus on:

Acute and long-term antithrombotic therapy, particularly with potent antiplatelet inhibitors

Novelties in lipid-lowering therapies

New invasive and non-invasive tools for the identification of patients and lesions benefiting from coronary revascularization

Optimal treatment of high-risk patients (e.g., patients with diabetes and/or chronic kidney disease)

Technical advancements in percutaneous revascularization, particularly for complex high-risk indicated procedures (CHIPs)

Prognostic assessment of coronary revascularization interventions, both surgical and percutaneous

We would be very happy to receive your contribution, and we look forward to receiving your input for this exciting project.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France
