Clinical Outcomes Following Percutaneous Coronary Intervention

Message from the Guest Editor

Percutaneous coronary intervention (PCI) is a common procedure offered to many patients with coronary artery disease. This encompasses a wide spectrum of patients from those with stable angina to critically unwell patients in cardiogenic shock. In our aging population, PCI is also increasingly performed in elderly patients and those deemed to be at prohibitive cardiac surgical risk. The cardiac catheterisation laboratory in which PCI occurs exemplifies multidisciplinary collaboration with medical and nursing staff, radiographers and cardiac technologists working together to optimise patient outcomes. In this Special Issue, the *Journal of Clinical Medicine* focuses on the clinical outcomes following PCI, examining multiple aspects such as radiation exposure, sex differences and bleeding outcomes as well as the utility of percutaneous mechanical circulatory support. We invite researchers to submit original research articles exploring PCI outcomes that have impacted their daily practice and patient care.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
