Current Status of Endoscopy in Clinical Medicine

Message from the Guest Editor

Since its development in 2001, capsule endoscopy (CE) has shown great progress over the past two decades, in device and reading software. It is also a minimally invasive procedure and does not require sedation; moreover, clinical applications have expanded to the colon. Recently, innovative advances in CE have been made in terms of artificial-intelligence-based automated lesion detection, and image-enhanced technologies. The ultimate goal of these technological efforts is to improve the diagnostic yield of CE. In the current Special Issue, we focus on the several key elements that are essential for an understanding of CE, recent advances, and their clinical impact. Invited topics include:

- Diagnostic yields and clinical impacts of capsule endoscopy (CE);
- CE and AI (artificial intelligence);
- Image enhancement of CE;
- Application of Colon and gastric and esophageal CE,
- Newly developed CE.

Guest Editor

Dr. Naoki Hosoe

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
