Clinical Advances in Arthroscopic Shoulder Surgery

Message from the Guest Editors

Recent advancements in shoulder arthroscopy have allowed surgeons to perform traditional open procedures and address complex procedures with minimally invasive techniques. Some of these procedures include the arthroscopic Latarjet, free bone block procedures, rotator cuff augmentation, biologic tuberoplasty, and lower trapezius tendon transfer. The current Special Issue highlights these advanced procedures and the evolution of these prior open procedures performed arthroscopically. More importantly, the surgical outcomes from these procedures are presented by experts in the field. We hope you find their contribution to the orthopedic literature beneficial and useful in your practices.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
