Advances in the Management of Intracranial Aneurysms

Message from the Guest Editors

The management of complex intracranial aneurysms oftentimes requires a combination of complex endovascular and open vascular techniques in order to provide patients with definitive treatment. From staging treatments to combining endovascular intervention with open surgery, the decision-making required is complex and necessitates comprehensive, multidisciplinary training to ensure long-term, durable outcomes. The dome protection of ruptured aneurysms in acute settings followed by delayed flow diversion or clip ligation, open surgery for recurrent endovascularly-treated aneurysms and upfront cerebral bypass combined with endovascular treatment are some of the nuanced decisions necessary in the modern era of cerebrovascular surgeries. In this Special Issue, we welcome authors to submit papers that highlight the multidisciplinary techniques needed to treat complex intracranial aneurysms and the nuances considered to improve patient outcomes.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
