Current Progress in Inflammatory Bowel Disease (IBD)

Message from the Guest Editors

Many research endeavors have focused on inflammatory events in the gastrointestinal tract, leading to an improved understanding of its pathogenesis. Such advances will hopefully lead to the advent of new therapies and continue to refine the evaluations used within current interventions. Such progress should, in due course, lead to enhanced outcomes of individuals diagnosed with ulcerative colitis, Crohn disease and other inflammatory conditions in the gut. MDPI invites investigators involved in the study of inflammatory bowel disease (IBD) to contribute to this Special Issue of the *Journal of Clinical Medicine*, which is fully dedicated to IBD. Original research or high-quality reviews are welcome within any field of IBD research and clinical management.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi
