Advancements of Modern Endoscopy

Message from the Guest Editor

The present era in endoscopy is perhaps the most exciting, ushering in a wave of diagnostic and therapeutic breakthroughs. Techniques such as chromoendoscopy and endoscopic ultrasound (EUS) for characterizing submucosal neoplastic lesions, and endoscopic submucosal dissection and full-thickness resection for removing them, have revolutionized the management of malignant and pre-malignant lesions, often omitting the need for a more invasive surgical resection. Therapeutic EUS has facilitated the endoscopic management of luminal and pancreatobiliary anastomoses, the intraluminal drainage of peritoneal and retroperitoneal collections and abscesses... Many of these advances have occurred with relatively small modifications to the endoscopic tools themselves, using creative problem-solving and enabling the off-label use of available equipment, although few key technologies such as high-resolution optic and ultrasound image processing... This Special Issue of Journal of Clinical Medicine serves as a conduit for understanding the impact of these advancements and many others on patient care. We are excited to share these findings with our readers.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
