Advances in Surgical Management of Orthopedics—Artificial Intelligence (AI) Applications and Robotic Surgery Techniques

Message from the Guest Editor

This Special Issue, "Advances in Surgical Management of Orthopedics—Artificial Intelligence (AI) Applications and Robotic Surgery Techniques", will explore the groundbreaking integration of AI and robotic technologies in orthopedic surgery. It will delve into the latest developments, research findings, and clinical applications of AI-driven algorithms and robotic-assisted surgical procedures, showcasing their potential to enhance precision, improve patient outcomes, and reduce recovery times. Contributions will cover a range of topics, including the role of AI in preoperative planning, intraoperative navigation, and postoperative care, as well as the recent advancements in minimally invasive robotic surgery techniques.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
