Bone Cancer: Diagnoses, Treatments and Challenges

Message from the Guest Editors

Bone involvement with tumors frequently occurs, and is the third most common site for tumor metastasis. Unusual cells grow out of control in patients' bones and destroy normal bone tissue. Considering the great negative effects on the quality of life of affected patients, clinicians have been working on novel treatments. Additionally, with the development of minimally invasive surgical techniques, clinicians have attempted to utilize these for the treatment of bone tumors. Nevertheless, clinicians have had to face challenges in deciding which treatment method is the most suitable and effective for each patient. This Special Issue, "Bone Tumor: Diagnoses, Treatments and Challenges", aims to collect original contributions focusing on the diagnosis and treatment of metastatic spinal tumors, spinal trauma, intervertebral disc diseases and degenerative spinal diseases using, for example, minimally invasive spinal surgery. We hope that our work improves or sheds light on treatments of bone tumor diseases and provides better treatment for patients.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
