Dry Eye Disease: Risk Factors, Diagnosis, Treatment and Prevention Measures

Message from the Guest Editors

Dry eyes are a common and debilitating chronic disease, with around one-third of the adult population affected and a growing incidence among children. The Tear Film and Ocular Surface Society Dry Eye Workshops (TFOS DEWS I and TFOS DEWS II) summarized the latest evidence to inform practice, but a lot of research is still needed to inform clinical practice to optimally enhance patients' quality of life. This Special Issue aims to showcase some of the latest research on epidemiology (including risk factors) and the diagnosis (including instrumentation/techniques) and management (including predictive markers) of dry eyes. Therefore, we invite original research and state-of-the-art review submissions. In particular, we would like to encourage the submission of manuscripts that will assist clinicians to develop better treatment decision trees to improve the long-term outcome of patients with dry eye disease. We look forward to your submissions! Prof. Dr. James J. Wolffsohn

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
