

Special Issue

Radiation Therapy for Head and Neck Cancer

Message from the Guest Editors

Radiation therapy is a standard of care, both in primary and adjuvant settings, in the treatment of head and neck cancer. However, radiotherapy is associated with significant acute and long-term complications. As survival rates of head and neck cancer are improving, the impact of radiation therapy in the long term becomes of utmost importance. The aim of this Special Issue is to present a series of original (pre)clinical trials/translational studies/review articles that will highlight the progress that has been achieved in the management of head and neck cancer. We look forward to receiving your contributions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
