Clinical Advances in Child Neurology

Message from the Guest Editors

The fields of pediatric neurology and psychiatry are increasingly overlapping, supported by new insights in unravelling the underpinning mechanisms of neurodevelopmental disorders. Although central nervous system plasticity is now better understood, neurological and psychiatric treatments for children remain scarce, and few affordable disruptive therapeutic options has emerged so far. Paradoxically, children are often better and sooner diagnosed, with few available treatment options besides rehabilitation. Nevertheless, many drugs are allowed to be administered after twelve years of age and have significant side effects, with long-term consequences requiring time to be properly assessed. Brain plasticity is maximal during early childhood, but this therapeutic window is not long enough to take advantage of. This Special Issue aims at gathering nonpharmacological innovative therapeutics able to improve the prognosis and quality of life of children with neurodevelopmental disorders, based on a combination of original research and review papers.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
