Novel Insights into the Prevention and Treatment of Contact Dermatitis

Message from the Guest Editors

We are pleased to invite you to contribute to this Special Issue, “Novel Insights into the Prevention and Treatment of Contact Dermatitis”. Contact dermatitis is defined as localized inflammation caused by skin contact with an external factor (e.g., physical or chemical). As a multifactorial disease, individual susceptibility, as well as environmental and occupational factors, play a role in the genesis of contact dermatitis. It can broadly be grouped into irritant and allergic forms, with mixed types being frequent. Contact dermatitis does not only result in a high disease burden for the individuals affected but also a high burden for society in terms of medical costs. Thus, it is of high importance to—at best—prevent contact dermatitis and treat cases by utilizing adequate therapeutic measures. This Special Issue aims to gather recent developments and achievements in the field of contact dermatitis. Herein, dermatitis will not only be considered in the private sphere but also in the occupational setting. In this Special Issue, original research articles and reviews are welcome.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
