Novel Insight into Cough: Seed of Respiratory Disease with a Focus on Children

Message from the Guest Editors

A cough is one of the most common complaints in outpatients, and it presents a particularly substantial burden for children and their families. Coughing has diverse and, often, multiple causes. Clinical experience has shown that the cause and pathogenesis of coughing have changed over time from the onset. The most common cause of coughing is upper respiratory tract infection, which usually remits spontaneously. However, the common cold may trigger the appearance of previously asymptomatic asthma, or the exacerbation of chronic obstructive pulmonary disease. The impact of the COVID-19 pandemic on the identification of coughing may have led to delays in diagnosis, such as refraining from respiratory function tests and consultations. In clinical practice, misdiagnosis is not uncommon. This Special Issue will focus on new insights into coughing from various perspectives with a focus on children and how this associates with future lung health. We look forward to receiving your contributions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
