Advances in the Diagnosis and Management of Dilated Cardiomyopathy

Message from the Guest Editor

DCM routine diagnostic aims to characterize cardiac function, morphology, and different etiologies of DCM. AI and ML approaches to data from routine diagnostics, showed the potential of new analytical methodologies to detect the phenotype in an earlier stage. The question remains whether an earlier diagnosis will lead to better survival and whether treatment should be started at such an early stage when there is no clear phenotype yet. Transcriptomic, metabolomic and proteomic datasets are emerging from DCM patients besides the genomic analysis. AI and ML approaches to these large-omic datasets will help to uncover the driving pathophysiology behind DCM and have the potential to detect novel treatment targets. An integrated approach of classic and novel diagnostics will be necessary to stratify patients for the right therapy.

This SI aims to illustrate recent advances in early recognition and diagnosis of DCM and the road toward individualized management for DCM patients. There will be a special focus on the diagnosis and management of family members of DCM patients who are at risk of developing the disease.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
