Gastroenteritis and Related Diseases: Current Knowledge and Therapeutic Prospects

Message from the Guest Editor

Gastroenteritis is the inflammation of any section of the gastrointestinal tract. This inflammation could be persistent, acute, or chronic, with various etiologies including genetics, infection, hypersensitivity, drugs, chemicals, and immunotherapy. The risk of an individual developing gastroenteritis is determined by both epidemiologic factors influencing exposure to causative organisms and underlying host factors affecting one's susceptibility to disease. To put the current evidence into context and identify gaps and research priorities in the areas of disease acquisition, burden of disease, clinical characterization, and the prevention and management of postinfectious gastrointestinal disorders, we require a multidisciplinary approach encompassing the areas of infectious disease, gastroenterology, epidemiology, and public health. This Special Issue will extensively cover key areas in epidemiology, and current and future treatment approaches in gastroenteritis and related diseases. We welcome author submissions of original articles, as well as reviews that could support future clinical progress related to this field.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
