Depression and Self-Injury in Adolescents: Mechanisms of Disease and Clinical Improvement

Message from the Guest Editor

Depression and self-injurious behavior are serious clinical problems that commonly emerge during the adolescent period and represent significant risk factors for suicide attempts and death by suicide in youth. The field is just now beginning to understand some of the mechanisms underlying depression and self-injury in adolescents, and these new neurobiological insights can serve to guide novel intervention strategies. The goal of this Special Issue is to update the field on the cutting-edge research on depression and self-injury in adolescents, with a particular focus on research that sheds light on neurobiological mechanisms of disease and of clinical improvement within a neurodevelopmental framework.

Guest Editor

Dr. Kathryn R. Cullen

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
