

## Special Issue

# Clinical Advances in Diabetic Retinopathy, Diabetic Cataract, and Other Diabetic Eye Disease

### Message from the Guest Editor

With age-associated frailty of the eye, diabetes sometimes deteriorates the quality of vision and leads to risk of blindness. Diabetes also causes various eye complications, including the following: cataracts; retinopathy; macular edema; retinal vascular diseases; and neovascular glaucoma. Imaging technology (wide-field fundus camera, optical coherence tomography (OCT), and OCT angiography, etc.) has progressed rapidly and treatments for diabetic eye disease (laser therapy, vitrectomy, eye injection with anti-VEGF drug or steroid, and systemic drugs for hyperglycemia) have been developed. However, there is still a need to focus on potential new therapies, minimally invasive treatments, more sustainable methods of treatment than traditional therapy, etc., to prevent diabetic eye disease.

This Special Issue aims to provide updated information including original clinical and laboratory research regarding the diagnosis and treatment of diabetic eye disease. Researchers in this field are encouraged to submit an original article or review to this Special Issue (case reports are not accepted).

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
