Special Issue

Early Diagnosis and Early Intervention for Children with Cerebral Palsy

Message from the Guest Editors

Cerebral palsy (CP) is defined as a group of permanent disorders of the development of movement and posture that cause activity limitations and can be attributed to non-progressive disturbances occurring in the developing fetal or infant brain. The diagnosis is made clinically, and the condition affects around 2/1000 live births. Early intervention has the theoretical potential to provide a greater degree of protection against adverse outcomes due to greater early neuroplasticity. However, several challenges remain. Firstly, early intervention requires accurate early diagnosis, and progress is being made in improving early detection in and the referral of affected infants. Secondly, the evidence base for effective early intervention remains limited. Thirdly, we need to determine how best to support families with a child with CP. This Special Issue aims to collate clinical studies that focus on early detection, evidence-based early intervention, and evidence for the effectiveness of methods of parental support, focussing on the first 1000 davs.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
