

Special Issue

Perspectives on the Diagnosis and Treatment of Cardiomyopathies

Message from the Guest Editor

Cardiomyopathies represent a diverse group of myocardial disorders that pose significant diagnostic and therapeutic challenges. Recent advances in imaging technologies, molecular diagnostics, and pharmacological therapies are transforming the clinical landscape. This Special Issue invites original research articles, reviews, and clinical perspectives that explore emerging tools and strategies to improve the care of patients with cardiomyopathy. We are particularly interested in contributions addressing the following themes

- **Cardiac Imaging:**The expanding role of advanced imaging modalities—including echocardiography, cardiac magnetic resonance, computed tomography and nuclear imaging—in the early detection and accurate phenotyping of cardiomyopathies.
- **Genetic Testing:**The integration of genomic insights into clinical practice, including the role of next-generation sequencing and polygenic risk scores in refining diagnosis and guiding family screening.
- **Novel Pharmacological Therapies:**Innovations in drug development for specific cardiomyopathy subtypes, including myosin inhibitors, gene-targeted therapies, and disease-modifying agents that reflect a shift toward a mechanism-based treatment.

Guest Editor

Dr. Luca Arcari

Cardiology Unit, Madre Giuseppina Vannini Hospital, Rome, Italy

Deadline for manuscript submissions

20 September 2026

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
