Clinical Updates in Imaging of Musculoskeletal Diseases

Message from the Guest Editors

In recent years, rapid technological progress has transformed musculoskeletal imaging, enabling earlier diagnosis, improved disease characterization, and more precise treatment planning. Innovations such as high-resolution MRI, dual-energy CT, and ultrasound elastography offer unprecedented detail in assessing diseases affecting bones, nerves, ligaments, and tendons. Moreover, artificial intelligence and machine learning are being increasingly integrated into imaging workflows, enhancing diagnostic accuracy and efficiency. These advances not only improve outcomes in trauma, arthritis, and sports injuries but also expand our understanding of musculoskeletal diseases. In this Special Issue, we invite authors to submit papers on the latest developments in musculoskeletal imaging, with a special focus on both clinical applications and future directions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
