Clinical Management in Gastroesophageal Reflux

Message from the Guest Editor

The burden of gastroesophageal reflux disease has increased in the past decades with increasing prevalence of obesity worldwide. The invasive management of gastroesophageal reflux has evolved over the years shifting from open to laparoscopic surgeries and minimally invasive endoscopic procedures. The durability of invasive procedures is still debated. The side effects of the long-term use of medical therapies are closely followed to assure safety of the patients who require lifelong treatment of reflux. Benefits of screening for esophageal adenocarcinoma utilizing non-endoscopic approaches are yet to be examined in large prospective trials. Despite international guidelines and worldwide consensus updates, evidence gaps are seen across the spectrum of reflux management. The aim of this Special Issue is to provide a comprehensive overview of the advances in diagnosis and treatment of gastroesophageal reflux, with particular interest in the use of innovative techniques and technologies. Therefore, researchers in the field of foregut disease management are encouraged to submit their findings as original articles or reviews to this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
