Advances in Gastric Cancer and Peritoneal Diseases

Message from the Guest Editor

Peritoneal disease can be the most frequent type of metastasis and site of recurrence in patients with advanced gastric cancer. This being the case, treatments of peritoneal disease should be the key for the improvement of prognoses for these patients. For years, we have focused on Stage IV gastric cancer with peritoneal disease. The intraperitoneal administration of paclitaxel (IP-PTX) has a great medical advantage in controlling peritoneal lesions and can be combined with various systemic chemotherapies. This Special Issue aims to highlight the current knowledge on gastric cancer and peritoneal diseases and underline possible diagnostic as well as therapeutic repercussions in gastric cancer and peritoneal diseases.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France
