Digital Health Technologies in Parkinson's Disease and Related Disorders

Message from the Guest Editors

Dear colleagues, Digital health technologies, such as smartphones, wearable sensors, and ambient sensors, are increasingly being studied in Parkinson's disease. The potential uses of digital health technologies in Parkinson's disease are broad. Digital health technologies have the potential to aid in the diagnosis of Parkinson's disease. Such technologies stand to improve the clinical care of individuals with Parkinson's disease. However, barriers to the widespread use of digital health technologies in Parkinson's disease remain, and less is known about the use of digital health technologies in related disorders and for assessing non-motor symptoms. This Special Issue aims to advance understanding of the use of digital health technologies in Parkinson's disease and related disorders. We encourage submissions that examine the clinical care and research applications of digital health technologies across all stages of Parkinson's disease and related disorders. We look forward to receiving your contributions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
