

Special Issue

Clinical Updates on Epilepsy Research

Message from the Guest Editor

As epilepsy continues to be a complex neurological disorder with diverse underlying mechanisms, this Special Issue seeks to highlight cutting-edge discoveries that refine our understanding and improve treatment strategies. We welcome contributions that explore autoimmune epilepsy, including emerging diagnostic tools, immunotherapy developments, and the role of neural autoantibodies in disease progression. Additionally, we are interested in experimental models, both animal and in vitro, that provide insights into epilepsy pathophysiology, helping bridge clinical observations with mechanistic understanding. Submissions on innovative treatments, including neuromodulation, gene therapy, and biomarker discovery, are highly encouraged, as well as work on advancements in epilepsy classification and predictive scoring systems that enhance clinical decision making. In this Special Issue, we welcome authors to submit original research, reviews, and case studies that offer novel perspectives on these evolving areas. We look forward to receiving your valuable contributions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
