Ultrasound-Guided Biopsy of Gynecological Tumors: Technique and Clinical Application

Message from the Guest Editors

The ultrasound-guided biopsy of gynecological tumors represents an accurate and safe diagnostic technique that is widely used in the pathological evaluation of ovarian, uterine, and pelvic masses and can accurately improve diagnostic rates. Ultrasound-guided needle biopsy refers to the ultrasound-guided insertion of a needle into a lesion and then the removal of some of the lesion tissue, followed by pathological and laboratory analyses to determine the nature of the relevant lesion tissue and how to treat it. This technique is mainly employed to determine the nature of unclear disease, such as whether a tumor is benign or malignant and whether there is inflammation. Its application range is very wide, and it has strong clinical practical value. For this Special Issue, we welcome the submission of papers related to ultrasound-guided biopsy in gynecological tumors.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
