

Special Issue

Ehealth, Telemedicine and AI in Clinical Medicine

Message from the Guest Editor

The importance of ehealth and telemedicine to citizens, patients, health providers, governments, and other stakeholders is rapidly increasing. They may improve access to services, reduce costs, and improve self-management. They may allow previously underserved populations to gain access to services. The health system is evolving, and so must its infrastructure and technology. As the importance of better health systems has increased among practitioners, healthcare needs intelligent systems that can deal with larger databases and provide better medical treatments. The rapid growth of the available digitised medical data has opened new challenges for the scientific research community. Artificial intelligence, big data and healthcare deal heavily with issues of complexity, efficacy, and societal impact. They are increasingly playing an important role in assisting physicians in various areas of medicine. This Special Issue aims to collect the latest approaches and findings, as well as to discuss the current challenges of AI based ehealth and telemedicine applications. The focus is on the employment of AI in a big data context.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
