Special Issue

Ehealth, Telemedicine and AI in Clinical Medicine

Message from the Guest Editor

The importance of ehealth and telemedicine to citizens, patients, health providers, governments, and other stakeholders is rapidly increasing. They may improve access to services, reduce costs, and improve self-management. They may allow previously underserved populations to gain access to services. The health system is evolving, and so must its infrastructure and technology. As the importance of better health systems has increased among practitioners, healthcare needs intelligent systems that can deal with larger databases and provide better medical treatments. The rapid growth of the available digitised medical data has opened new challenges for the scientific research community. Artificial intelligence, big data and healthcare deal heavily with issues of complexity, efficacy, and societal impact. They are increasingly playing an important role in assisting physicians in various areas of medicine. This Special Issue aims to collect the latest approaches and findings, as well as to discuss the current challenges of AI based ehealth and telemedicine applications. The focus is on the employment of AI in a big data context.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès
Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi
Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:
indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:
JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
