Surgical Treatment of End Stage Heart Failure

Message from the Guest Editor

The special issue on “Surgical Treatment of End-Stage Heart Failure” aims to collect the most updated and disruptive scientific achievements worldwide on heart transplant related techniques and the use of Ventricular Assist Devices and Total Artificial Hearts either as bridge to transplant or bridge to recovery or destination therapy. Beyond specialists from cardiac medicine, we also welcome submissions from researcher with focus on imaging, biomedical engineering, psychosocial aspects of human / implantable device interaction or other affiliated disciplines in order to enhance the awareness of the chances of surgical treatment of heart failure in modern cardiovascular medicine.
