Endometrial Cancer: Latest Advances and Prospects

Message from the Guest Editor

Endometrial cancer is the most common gynecological malignancy in developed countries. Furthermore, its incidence and mortality are increasing. In the past few years, multiple lines of research have been developed. These range from the proposal of a new TCGA-based molecular classification system, to the adoption of the sentinel lymph node mapping for surgical staging as opposed to a full lymphadenectomy, to the adoption of fluorescent dyes for the sentinel lymph node mapping, and to the definition of new adjuvant treatment strategies tailored to pathological findings (e.g. combined chemo-radiotherapy). All of these developments aim to create an improvement in oncologic outcomes and a reduction in treatment-related toxicities.

The present Special Issue aims to focus on recent advances in the management of endometrial cancer patients. In summary, treatment of endometrial cancer is constantly evolving and the development of new surgical techniques, new equipments, as well as a new understanding of biological aspects has significantly impacted on the management of this malignancy.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
