# Endometriosis and Infertility: Insights into the Causal Link and Management Strategies

### Message from the Guest Editor

Endometriosis is highly prevalent among women of reproductive age and is frequently associated to infertility. Several studies have demonstrated that anatomical changes may impair gametes and embryo transport along the fallopian tubes; per se, endometriosis could affect the ovarian reserve, peritoneal endometriosis may lead to a pro-oxidant peritoneal microenvironment and the peritoneal fluid may alter sperm function. The reduced endometrial receptivity could also play a role in infertility of women affected by endometriosis. Regarding the management strategies, different treatment options of endometriosis-related infertility include minimal invasive surgery as well as assisted reproductive technologies. Even the presence of ovarian endometrioma is related to infertility in the majority of cases, the impact of deep endometriosis on infertility is less clear and the place of conservative versus radical rectal surgery has to be defined. Moreover, due to the effect of endometriosis on ovarian reserve as well as the impact of surgery of large endometriomas on the ovarian reserve, the oocytes cryopreservation could be considered as a new option to preserve future fertility.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
