Glomerular Diseases: Advances in Diagnosis and Management

Message from the Guest Editors

The field of glomerular diseases is evolving at an unprecedented rate. A number of immunomodulating drugs have recently been introduced into routine clinical practice, while others are likely to expand our therapeutic array. We are more aware of the advantages and shortcomings of the “standard” agents, such as cyclophosphamide and rituximab, and are implementing conservative therapy. However, progress and challenges go far beyond novel treatments. The search for biomarkers that allow subclassifying heterogeneous entities is ongoing, as is research on genetics of podocytopathies and atypical hemolytic uremic syndrome. The epidemiology of glomerular diseases is also changing, as monoclonal gammopathy of renal significance and rarer diseases are better characterized, while cases of new-onset immune-mediated disorders, post-immune checkpoint inhibitors and COVID-19 vaccines have posed fundamental questions regarding disease drivers. In this Special Issue of the Journal of Clinical Medicine, we will focus on recent advances in the study of glomerular diseases and welcome authors to submit their contribution to this rapidly transforming topic.

Guest Editors

Dr. Marco Allinovi

Nephrology, Dialysis and Transplantation Unit, Careggi University Hospital, 50139 Florence, Italy

Dr. Giorgio Trivioli

Department of Nephrology, Cambridge University Hospitals NHS Foundation Trust, Cambridge, UK

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
