New Insights into Orthodontic Treatment

Message from the Guest Editors

The present Special Issue aims to highlight the new insights in this field, promoting the production of relevant scientific literature with research articles or reviews on new digital techniques or clinical assessments in orthodontics, such as the following:

- The use of CBCT in orthodontic diagnosis, treatment planning, and stability assessment.
- Airway and craniofacial development evaluations.
- Digital orthodontic workflows in maxillofacial surgery.
- AI applications in orthodontics.
- Clear aligner therapy suitable for growing patients and those with periodontal disease.

We await your esteemed contributions with great interest, confident that they will enrich and advance the field of “third-millennium” orthodontics.
