

## Special Issue

# Latest Advances in Urinary Incontinence: Part II

### Message from the Guest Editors

A relatively common condition in the world's population, urinary incontinence has a negative effect on patients' quality of life and is costly for society. Another extremely bothersome chronic disorder linked to urgency incontinence is overactive bladder syndrome, which can be both idiopathic and neurogenic. It affects both sexes equally and negatively impacts every part of patients' lives.

To perform a more thorough evaluation of the lower urinary tract, sphincter function, and pelvic floor, the search for novel diagnostic instruments continues. The approach to therapy has changed substantially and now includes a variety of treatments, from conservative management to different surgical techniques.. There is still no "perfect treatment" for urine incontinence despite the huge variety of options. New minimally invasive treatment alternatives and non-invasive therapies are therefore urgently needed.

In the previous Special Issue we managed to collect papers that have had a great impact on incontinence diagnosis and management; we are confident that in the part II we will go even further.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
