New Sights in Retinal Diseases Therapeutics: Innovation and Clinical Practice

Message from the Guest Editors

Over the past decade, the field of retinal disease management has undergone a profound transformation. This evolution has been driven by significant progress in both retinal imaging technologies and therapeutic strategies. Multimodal imaging now offers an increasingly precise evaluation of retinal pathologies and enables the identification of novel biomarkers that can guide treatment decisions and predict therapeutic outcomes. This Special Issue is dedicated to showcasing recent advancements in the diagnosis and treatment of retinal diseases, and to exploring how these innovations are reshaping clinical practice. We welcome a wide range of contributions, spanning from cutting-edge diagnostic techniques to emerging therapies for retinal disorders. We invite the submission of high-quality original research articles as well as insightful reviews that reflect the current state of knowledge and future directions in the field.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
