

Special Issue

Urologic Oncology: From Diagnosis to Treatment

Message from the Guest Editors

Advances in diagnostic imaging, molecular and genomic profiling, and minimally invasive techniques have significantly enhanced our ability to detect, characterize, and treat genitourinary malignancies. Cancers of the prostate, bladder, kidney, testis—which once relied on limited diagnostic and therapeutic strategies—are now managed with precision-based approaches, improving both oncological control and quality of life. Robotic-assisted surgery and advanced ablative technologies are redefining surgical standards, while immunotherapy and targeted agents are transforming systemic treatment paradigms. However, they also present challenges regarding optimal patient selection, long-term outcomes, and integration into clinical practice. In this Special Issue, we invite contributions encompassing original studies, clinical series, and review articles that highlight innovations in diagnostics, surgical techniques, therapies, and the multidisciplinary management of urological cancers. Our aim is to provide a comprehensive overview of the evolving field of urological oncology and to stimulate a discussion on how these advances can best be translated into everyday practice.

Guest Editors

Dr. Matteo Vittori

Robotic and Minimally Invasive Urology Unit, Tor Vergata Hospital, Rome, Italy

Dr. Valerio Iacovelli

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
