Clinical Research and Perspectives in Hepatobiliary Surgery and Liver Transplant

Message from the Guest Editor

Hepatobiliary surgery and liver transplantation are undergoing rapid transformation. The growing burden of primary and metastatic liver malignancies, advanced chronic liver disease, older and more complex patients, and persistent organ scarcity are reshaping clinical decision-making. At the same time, minimally invasive and robotic surgery, intraoperative imaging, precision oncology, advanced organ preservation, machine perfusion and the broader use of extended-criteria and donation-after-circulatory-death grafts are expanding therapeutic possibilities.

This Special Issue aims to present and disseminate recent clinical and translational advances in hepatobiliary surgery and liver transplantation, with particular emphasis on their impact on patient selection, operative strategy, perioperative management and short- and long-term outcomes. We invite original clinical studies, randomized and non-randomized trials, prospective or retrospective cohort studies, registry analyses, systematic reviews, meta-analyses and clinically focused narrative reviews. Technical or translational studies are also welcome when they demonstrate a clear pathway toward clinical application.

Guest Editor

Dr. Marco Maria Pascale

About the Journal

Message from the Editor-in-Chief

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2026).
