

Special Issue

New Advances in Uterus and Ovarian Transplantation

Message from the Guest Editor

As the of this Special Issue, I invite you to submit your novel research and reviews pertaining to uterus and ovary transplantation. In this Special Issue, we will seek to explore the next questions in the field, including, but not limited to, the following: tissue bioengineering; challenging cases in reproductive transplants either due to oncologic, technical, or ethical concerns; new techniques and surgical innovation; expanding access to reproductive transplants, including transgender individuals; cost effectiveness and payment for reproductive transplant services; and calls to action for research needed in these innovative fields. As a journal of general scientific interest that is not solely restricted to transplant surgery or reproductive medicine, this Special Issue in the *Journal of Clinical Medicine* will bring together a multidisciplinary group of authors to highlight what is next on the horizon. Your contributions are greatly needed.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief
