

Special Issue

Clinical Risks and Perinatal Outcomes in Pregnancy and Childbirth

Message from the Guest Editors

Pregnancy and childbirth are both situations that can bring about many changes. Pregnancy complications, including hypertensive disorders, gestational diabetes, fetal growth restriction (FGR), stillbirth and preterm delivery, are relatively common and may affect up to 25% of all pregnancies. These complications are in turn associated with both short- and long-term maternal and neonatal morbidity, including increased risk for neurodevelopmental and cardiovascular disease in the future. The goal of maternal–fetal medicine specialists is to improve perinatal outcomes of high-risk pregnancies while also prolonging the gestational age at delivery and eliminating the risk of complications, although the implementation of new techniques or medications is often an obstacle to current research because of ethical issues. The goal of this Special Issue is to encourage the submission of papers on current advances in prenatal diagnosis, the screening, management, prediction and prevention of pregnancy complications and associated clinical risks, and perinatal outcomes in modern obstetrics.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
