Special Issue

COVID-19-Associated Myocardial Injury and Other Cardiovascular Diseases

Message from the Guest Editors

The coronavirus disease 2019 (COVID-19) pandemic has dramatically changed the lives of billions of people and healthcare systems worldwide. Despite being caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), besides the lung, this infectious disease also has severe implications in the cardiovascular system. There is a growing body of evidence suggesting worse outcomes and increased mortality among COVID-19 patients with preexisting cardiovascular diseases. Indeed, SARS-CoV-2 infection can directly or indirectly cause a series of cardiac complications. including acute myocardial injury and myocarditis, acute myocardial infarction, heart failure, and cardiogenic shock and arrhythmias. The aim of this Special Issue is to investigate different aspects of the relationship between COVID-19 and the cardiovascular system, to promote our understanding of the underlying mechanisms, which would aid in identifying and appropriately treating cardiovascular diseases in patients with COVID-19.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
