Pancreatic Diseases Through the Lens of EUS and ERCP: From Risk Stratification to Intervention

Message from the Guest Editor

Over the past decade, endoscopic ultrasound (EUS) and endoscopic retrograde cholangiopancreatography (ERCP) have expanded their diagnostic and therapeutic capabilities, reshaping clinical pathways for conditions ranging from pancreatic ductal abnormalities to cystic lesions and pancreatitis. An increasing reliance on minimally invasive approaches, and a growing demand for accurate risk stratification tools that can guide timely interventions.

This Special Issue aims to present and disseminate the most recent advances related to the diagnosis, risk stratification, and interventional management of pancreatic diseases through EUS and ERCP. Original research, reviews and real world data analyses are encouraged, with a particular interest in studies that clarify how endoscopic approaches can improve patient selection, safety, and long term outcomes.

Topics of interest include, but are not limited to:

- Diagnostic applications of EUS in pancreatic diseases
- EUS guided therapeutic interventions
- ERCP techniques and innovations in pancreatic disorders
- Stent technologies and management of ductal strictures
- Artificial intelligence, advanced imaging, and emerging technologies

Guest Editor

Dr. Maria Cristina Conti-Bellocchi

Diagnostic and Interventional Endoscopy of Pancreas, GB Rossi
University Hospital, Pancreas Institute, University of Verona, 37134

About the Journal

Message from the Editor-in-Chief

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2026).
